

MAKEMUSICNEWYORK

Timbalooloo

Timbalooloo invites children to explore music as a living language, where instruments “speak” through rhythm, melody, emotion, humor, and character. Through imaginative musical play, children learn to express themselves by giving instruments personalities, creating musical conversations, and discovering the joy of making sounds come alive. Drawing inspiration from musical traditions around the world — including Brazil, Cuba, West Africa, East Asia, Europe, and beyond — Timbalooloo introduces children to a wide range of rhythms, songs, and sounds. Along the way, they build confidence, creativity, cultural curiosity, and an intuitive love of music that speaks across cultures.
